

Power Transmission Products & Solutions for Iron Ore Mining

Choose Rexnord to help you deliver tomorrow's iron ore today.

From purchase and installation to field monitoring and service, Rexnord helps maximize your uptime, productivity and profit. Keep your mine producing with our high-quality, mission-critical products.

Mining expertise.

Work with a true partner who understands your applications, specifies the right equipment and adds value at every step. Rexnord has kept materials moving through mining operations for more than a century. From extraction to material handling to mineral processing — mine operators, equipment manufacturers and consulting engineers turn to Rexnord for their power transmission solutions.

Rexnord is with you every step of the way.

From purchase and installation to testing, monitoring, repair and overhauls, Rexnord provides outstanding lead times and customer service. Count on our superior product quality, on-the-spot field service and industry-leading technical support to prevent costly maintenance, repairs and shutdowns, maximizing your return over the product's total lifecycle. With sales and service operations in mining regions worldwide, and a vast network of distributor relationships, we deliver exactly what you need, when you need it.

Rexnord products, Rexnord reliability.

Rexnord is a leading manufacturer of critical system components that perform under the most rigorous demands in your iron ore mining applications, including gear drives, bearings, chain and couplings. With safety in mind, our products are engineered to meet cost and performance criteria to ensure the most efficient solution for specific applications.

Right where you need us.

The background image shows a complex industrial facility, likely an iron ore processing plant. It features several large, horizontal rollers or conveyor belts, some with perforated surfaces, arranged in a series. The structure is made of dark metal with various pipes, ladders, and walkways. The lighting is warm and somewhat dim, creating a sense of a busy, industrial environment.

Iron Ore Processing

From crushing and grinding to pelletizing and stockpiling, Rexnord will help you determine the right power transmission products for your iron ore application. Our engineered products are designed for the rigorous demands of continuous operation, minimizing wear and maximizing efficiency throughout the process.

Rexnord — Keeping your mines operating.

Iron is one of the most common elements on Earth, comprising about five percent of the Earth's crust. To extract and process iron ore from beneath the surface rock efficiently every day, it requires an orchestrated operating process. From crushing and grinding to pelletizing and stockpiling, you need the right strategic partner to support your operation.

Rexnord mining industry experts understand that productivity of your operation and uptime of your mining equipment are critical. Rexnord will help you determine the right power transmission products for your application to achieve your goals.

Mining equipment and its components need to be reliable to support the main production goals of an iron ore operation, no matter where the mine is located in the world. From the quiet workhorse gear drives that supplies the right amount of torque in your overland conveyors, to the right couplings that transfers the power to the motor to your mining machines, Rexnord has the product solution for your application.

Here is a list of Rexnord products at work extracting tomorrow's iron ore today:

Gear Drives

Falk V-Class Gear Drives
Falk A-Plus Gear Drives

Torque Limiting Devices

Autogard Torque Limiters

Bearings

Rexnord SAF-Style Bearings
Rexnord SHURLOK Adapter Mount Spherical Roller Bearings
Rexnord Cylindrical and Spherical Roller Bearings

Couplings

Falk Steelflex Grid Couplings
Falk Lifelign Gear Couplings
Falk True Torque Fluid Couplings
Falk Orange Peel Rotating Shaft Guards

Bearings – Uptime is everything.

For 100 years Rexnord bearings have been built to survive the toughest applications in the harshest environments. Our bearings feature superior sealing and shaft mounting technology and performance surfaces precision-ground, as well as high thrust and radial load capacities.

Bulk Material Handling — Belt Conveyors

From small feeder conveyors to large overland conveyors, belt conveyors offer limitless variations to efficiently transport your iron ore. Our product and mining application experts will help you determine the ideal configuration and component selection for your conveyor application.

From the beginning to the end ... Rexnord will be there.

Since the first conveyor belt was used to transport iron ore, Rexnord has been there. Our company experience spans more than a century and we strive each day to make your bulk material handling applications more efficient. After more than 100,000 engineering design hours, we introduced the Falk V-Class Gear Drive, the most dependable gear drive ever built. This is just one example of how Rexnord continues its commitment to providing customers with the drives they need to succeed.

We keep your iron ore moving.

Belt conveyors are used every day to transport millions of tons of iron ore around the world, and Rexnord power transmission solutions are helping move that material.

The right solution to meet your application needs.

Belt conveyors offer limitless variations to efficiently transport your iron ore. Few organizations have the breadth of product solutions backed by industry knowledge that Rexnord supplies. Tens of thousands of those solutions are at work right now conveying iron ore. From the quiet workhorse gear drive that keeps the conveyor moving at precise speeds, to the critical link of the coupling that transfers the power from the motor to the gearbox, to our reliable bearings that keep the conveyors rolling, Rexnord has the product solution for your application.

Here is a list of Rexnord products at work conveying tomorrow's iron ore today:

Gear Drives

Falk V-Class Gear Drives
Falk A-Plus Gear Drives
Falk Quadrive Shaft-Mounted Gear Drives
Rexnord Planetgear Gear Drives

Torque Limiting Devices

Autogard Torque Limiters
Falk True Hold Backstops

Bearings

Rexnord SAF-Style Bearings
Rexnord SHURLOK Adapter Mount Spherical Roller Bearings

Couplings

Falk Steelflex Grid Couplings
Falk Lifelign Gear Couplings
Rexnord Omega and Viva Elastomeric Couplings
Falk Wrapflex Elastomeric Couplings
Falk True Torque Fluid Couplings
Falk Orange Peel Rotating Shaft Guards

Gear drives — Keep you in motion.

The Falk and Rexnord brands of industrial mechanical power transmission solutions have been providing iron mines with high-quality, reliable and rugged products for more than 100 years. Whether your application requires a Falk A-Plus Gear Drive for an overland conveyor, a Rexnord Planetgear Gear Drive for an apron or belt feeder, a Falk V-Class Gear Drive for a slurry pump or in-plant conveyor, or a Falk Ultramite Gearmotor for a flotation cell, Rexnord has the gear drive product to meet your application needs.

Slurry Pumping

Once the conveyors deliver the ore to the concentrator, the slurry pumps take over the business of moving the material through the beneficiation process. Our product and mining application experts will help you determine the ideal selection of components to keep your process running.

Rexnord — Ensuring pumps keep running to keep the money flowing.

The concentration process is where the money is made in an iron ore operation. In order to achieve the highest quality and grade, ore typically undergoes separation processes that utilize a slurry pump to move ore, concentrate and tailings. This makes the centrifugal slurry pump the heart of the ore concentrator and a critical profit center. As such, cost of ownership factors including longevity, capacity, efficiency and maintenance are the priority. Rexnord products are the essential power transmission solutions to keep the pumps pumping.

The Falk V-Class Gear Drive was developed through extensive customer needs analysis to be an industry breakthrough in gear drive technology and to be your solution to the toughest challenges. Backed by our industry-leading warranty, the Falk V-Class Gear Drive has a longer operating life, which means increased productivity and less unscheduled downtime. The rugged design withstands the toughest environments and applications with superior thermal performance and efficiency. The Falk V-Class Gear Drive is drop-in replaceable for virtually any drive, and built-in features make it easy to service.

Falk Couplings are the critical link to transfer power from the motor to the pump impeller. Our dependable, industry-leading coupling solutions will help you avoid unplanned outages. Rexnord application experts can tailor a long-life, low-maintenance, high-reliability solution to optimize your operation.

Here is a list of Rexnord products at work pumping slurry to process tomorrow's iron ore today:

Gear Drives

Falk Ultramite Gearmotors
Falk V-Class Gear Drives
Falk A-Plus Gear Drives

Bearings

Rexnord Cylindrical and Spherical Roller Bearings

Couplings

Falk Steelflex Grid Couplings
Falk Lifelign Gear Couplings
Rexnord Omega and Viva Elastomeric Couplings
Falk Wrapflex Elastomeric Couplings
Falk Orange Peel Rotating Shaft Guards

Couplings — The critical link.

A critical link between motor and machine in a power transmission solution is the coupling, and Rexnord understands that perfectly.

We have a history of innovation that dates back to 1919, and is built on an installed base across countless industries with worldwide reach. The broad array of Rexnord Coupling designs enables a deep knowledge of end-user needs that makes us keenly in tune with application details.

Why Choose Rexnord?

When it comes to providing highly engineered products that improve productivity and efficiency for industrial applications worldwide, Rexnord is the most reliable in the industry. Commitment to customer satisfaction and superior value extend across every business function.

Delivering Lowest Total Cost of Ownership

The highest quality products are designed to help prevent equipment downtime and increase productivity and dependable operation.

Valuable Expertise

An extensive product offering is accompanied by global sales specialists, customer service and maintenance support teams, available anytime.

Solutions to Enhance Ease of Doing Business

Commitment to operational excellence ensures the right products at the right place at the right time.

REXNORD

Rexnord Company Overview

Rexnord is a growth-oriented, multi-platform industrial company with leading market shares and highly trusted brands that serve a diverse array of global end markets.

Process and Motion Control

The Rexnord Process & Motion Control platform designs, manufactures, markets and services specified, highly engineered mechanical components used within complex systems where our customers' reliability requirements and the cost of failure or downtime are extremely high.

Water Management

The Rexnord Water Management platform designs, procures, manufactures and markets products that provide and enhance water quality, safety, flow control and conservation.
